

ACTACC WEBINAR

EPISODE 11: ROYAL PAPWORTH HOSPITAL NHS FT

Tuesday 27th January
19:00 – 21:00

Live webinar
via Zoom

Applied for
2 CPD Points

SUPPORT THE HEART, CHECK THE CHARTS, TRUST THE TOE & CHOOSE YOUR MOMENT

Dr Guillermo Martinez will share insights from his role as a Cardiac Anaesthetist supporting Non-Cardiac Surgery, exploring peri-operative challenges and practical strategies when managing high-risk cardiac patients outside the traditional cardiac setting.

Dr Hannah Kiziltug will take us on a journey from Chaos to Control, demonstrating how Statistical Process Control (SPC) charts can transform quality improvement work and support better, data-driven clinical decisions.

Dr Thomas Chloros will focus on the evolving role of TOE in Impella support, highlighting imaging techniques that are crucial for safe implantation, optimisation, and troubleshooting in advanced mechanical circulatory support.

Finally, Dr Antonio Rubino will tackle the complex question of VSD management — when to wait, when to optimise, and when to intervene — drawing on real-world experience to guide decision-making in challenging clinical scenarios.

These sessions promise to be highly practical, thought-provoking, and relevant across multiple specialties. We hope you can join us for what will be a stimulating and educational programme.

PROGRAMME

19:00	Welcome	Dr Ganesh Ramalingam
19:05	Cardiac Anaesthetist for the Non-Cardiac Surgery	Dr Guillermo Martinez
19:30	Chaos to Control: SPC Charts for Better QI Decisions	Dr Hannah Kiziltug
19:55	TOE for Impella	Dr Thomas Chloros
20:20	VSD management: wait, optimize or repair?	Dr Antonio Rubino
20:45	Live Q&A with speakers.
